

8.0 Release M8

Full details of the fixes in M8 can be found on the JIRA project: [JIRA M7 Release](#).

XOL-6 Fallback access to log database as signer rather than current user

XOL-7 Refactor print statements to server console to prefix with "XOL: "

XOL-8 If there is an error opening the OpenLog database to log to, also log the user the code is trying to run as.
