

Using the WWS API Java SDK

Maven Central can be used to automatically include the SDK in your Maven project or to download the jar file for manual inclusion. The SDK has been included in the Workspace Client 4 Eclipse, to show how it can be incorporated into a Notes plugin.

Latest Release Information

The latest release is 0.6.0. This is the first official public release. All unit tests pass at this stage but a number of changes have been made since it was incorporated into Workspace Client 4 Eclipse.

The release supports:

- Authenticating as a user
- Authenticating as an application
- All GraphQL queries
- All GraphQL mutations
- Posting a Message to a Space

The [published Javadoc](#) is for version 0.6.0.

Any issues should be posted to [JIRA](#).
